Approach to PPPs Breakdown by Value and Number of Projects*

Approach to PPPs	Number of projects	Value of projects (in US\$ billion)
Concessions (based on federal law No.115-FZ)	2 696	30.8
PPPs/MPPs (based on federal law No.224-FZ)	87	6.6
Quasi-PPPs	657	22.3
Total	3 440	59.7

The main reasons for the concessions prevalence

- ✓ The federal law No.115-FZ has been in force more than 15 years ago. The sufficient practice has already been accumulated
- ✓ The law allows to implement only the BTO model. This fact significantly simplifies and speeds up structuring a PPP project and procurement process for the public authorities
- ✓ The law does not presuppose the calculation of criteria 'Value for Money'. This makes it easier for civil servants to make decisions on projects
- ✓ Due to the above reasons, significantly lower (in comparison with PPPs under the federal law No.224-FZ) qualification of civil servants is required to manage a PPP project
